

Trinity 500 Update

Production of the Trinity 500 has begun, and the first truck load of 6 boats has been delivered.

We've been lucky to receive some additional money via a donation to help part fund purchase, which means we have six on offer at half the usual price. If you would like one please send a cheque payable to us at HQ, these boats are available on a first come first served basis, so get those cheques in the post swiftly!

However there are still some teething problems at factory level which means we can't yet confirm the pace of supply and give a cast iron forecast of when a Unit's boat will be delivered. As soon as a reasonable forecast can be made, we will let you know via the T&A site.
