

## **USE OF TRINITY 500 IN THE NATIONAL COMBINED REGATTA**

Due to ongoing component supply difficulties, we do not yet know when production of the Trinity 500 will be able to start. I have therefore had to review the policy of using the new boat in the National Combined Regatta in September this year.

I intend that the new boat will be used in the NCR this year, subject to there being 5 of them in each Area by 18 July 2010. This date has been chosen as the day after the last of the Area regattas, on the basis that all Units who have won places in the National Regatta will then be known, and all will have access for the same amount of time to train in the new boat for the regatta.

M Windsor, Captain Sea Cadets'
